

Custom Conveyor System

Conveyor System with Automated Marking

The KM-RC Conveyor System features a highly modular design, equipped with a dual chain drive and steel roller attachments to handle a wide range of product sizes and shapes. Ideal for applications requiring frequent product changeovers, the system offers flexibility and adaptability for dynamic production environments.

Features

- Versatile Size Capacity: Accommodates parts up to 12" wide x 24" long x 3" thick
- High Load Capacity: Supports loads up to 2000 pounds
- T-Slot framework provides easy integration of additional stations
- Customizable Length: Can be tailored to fit your needs
- Includes all Sensors, Stops, Clamps and Logic
- Precise Part Handling with 7/8" diameter conveyor rollers spaced 1" apart
- Easy loading and fast setup
- KwikMark markers can be positioned anywhere along the conveyor length
