

# Cylinder Marker

## Metal Cylinder, Bottle & Tank Marker

This system is engineered for high-speed dot peen marking of cylinders, bottles, tanks, and other round, angular, or irregularly shaped tubular surfaces. Its open-top loading design streamlines production and offers exceptional flexibility for handling products of varying lengths and diameters.

### Features

- Open-top loading streamlines production and fits products of varying lengths and diameters
- Automatic clamping and registration
- Pneumatic regulator, filter and gauge control marking depth for consistent results
- The fully integrated controller operates independently, No need for a PC
- Side marking enables easy, open access for easy top access
- Supports foot pedal operation
- Self-cooling design with just on moving part
- Software supports operating multiple machines
