

# SA-90

## Sine Attachment

The SA-90 sine attachment is available to allow pivoting the rotary fixture headstock when marking certain angular surfaces. This device is bolted on and may be removed from the system, when not needed.

### Features

- Models for both the Kwik Turn and the Kwik Turn 5-C are available
- The sine attachment is bolted on between the Kwik Turn and its base
- The angle is adjustable from zero to ninety (0-90) degrees
- Easily removable from system, when not needed
