## **Kwik-Chuck**

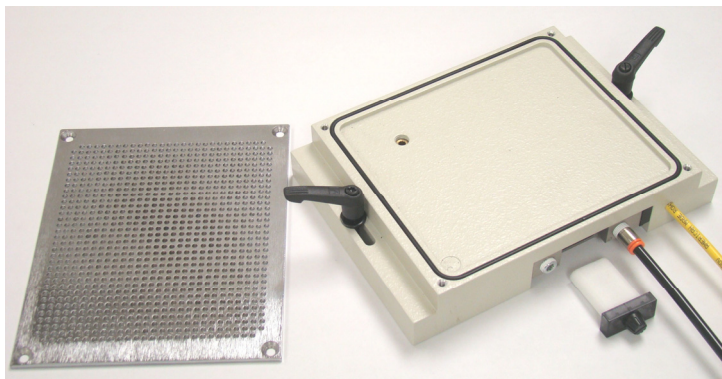

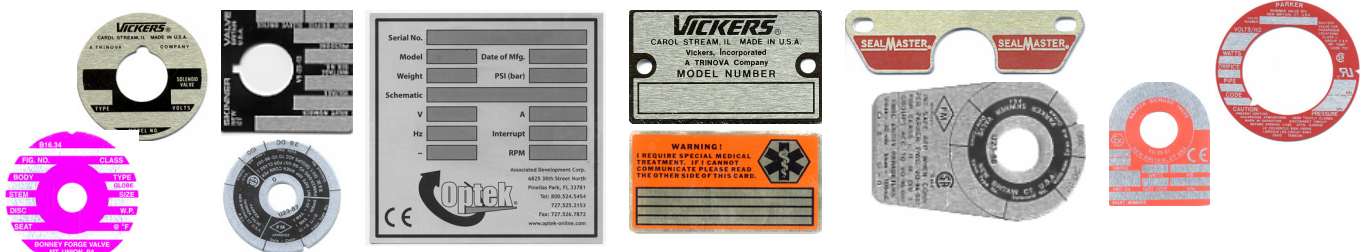

### **Nameplate / Part Vacuum Holding Table**

The Kwik-Chuck **KC-64** system is designed to streamline your nameplate and tag marking operation using self generating vacuum to hold down & flatten products during the marking operation.

The system is self contained and requires no external vacuum systems or pumps! Just plug it into the side of the Kwikmark machine and go.

Includes a laser cut urethane top mask that may be customized.

#### Features:

- Modular design / internal logic
- Fits onto optional T Slot table
- Automatically turns on at cycle start
- Shuts off after part is marked
- Adds positive air "puff" to release part
- Plugs into side of the machine
- Heavy precision base plate
- Removable steel top plate
- Integrated vacuum system
- Field removable filter system
- 6" x 4" effective vacuum area
