Larger Format Flat Bed Marker

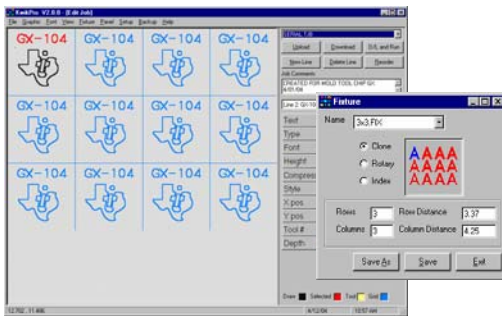

The bench top gantry is a flat bed, CNC type structure designed for fast and efficient marking / engraving of your parts.

The large top plate includes pre tapped holes for mounting your own fixturing or choose one of our vacuum plates, tapped bread boards, etc.

Machine Tool Performance

Each axis (XYZ) features pre-loaded leadscrews and ball slides for machine tool performance and rigidity.

The on board processor requires no external PC for operation. The Compact Flash Card stores all marking files, setup parameters etc.

Dozens of Pre Set Functions

Cloning is one of the many time saving features included in the software package.

Software supports operating multiple machines (through the built-in server) to control serialization and sequencing automatically.

Includes RS-232 and network (LAN) connectivity.

Easy to use & understand setup screens
